Professional Summary

Results-driven **Data Scientist** with over 8 years of experience in **machine learning, predictive modeling, and GenAI applications, including Retrieval-Augmented Generation (RAG)**. Proficient in **Python, SQL, and statistical analysis**, with a proven track record of building scalable forecasting models and optimizing decision-making across FMCG, retail, and healthcare domains. Skilled in **feature engineering, data visualization, and deploying cloud-based solutions on Azure**. Adept at translating business needs into actionable insights and collaborating across cross-functional teams to drive measurable impact.

Experience

Tiger Analytics, Hyderabad, India

Data Scientist | Sep 2019 – Present

- Created **Promotion Optimizer & Simulator** for different channels and geographies (Trade Promotion – Brick and Mortar, Paid Search & Media – E-Commerce), allowing clients to build scenarios and plan trade promotions at a weekly level, and understand the impact on financial metrics for clients and retailers.
- Performed an **Omnichannel Analysis** to measure the impact of any promotion on Brick-and-Mortar channel which is running on Ecommerce platform using multiple models built.
- Developed **data quality management system** for an FMCG company, which helped clients in leveraging different high-quality datasets (Nielsen, Kroger, Amazon, etc.) across different projects.
- **Price Elasticity Estimation (Marketing Mix Models)**: Built linear mixed-effects models in **R**, incorporating COVID variables, reducing **refresh cycle time by 50%**, and improving **MAPE from 20% to 13%**. Results fed into a **Price-Volume-Profit tool** for pricing strategy simulations.
- **ML Deployment (R Shiny App)**: Tested and deployed a **Trade Promotion Optimizer** app using **Docker & Azure App Service**.
- Designed end-to-end azure data factory pipeline for different projects.

AlgoLeap Technologies Pvt Ltd, Hyderabad, India

Data Science Analyst | Sep 2018 – Aug 2019

- **Outpatient Forecasting**: Developed an ensemble-based **time series model** in **R & Python** to predict hospital patient volumes, achieving **MAPE = 7%**. Automated weekly forecasts using **SQL pipelines**.
- **Patient Wait Time Prediction**: Built and fine-tuned **Random Forest, Decision Tree, and XGBoost models** to predict patient wait time. Improved accuracy via **hyperparameter tuning**.

AltairQ, Hyderabad, India

Data Analyst | Sep 2017 – Aug 2018

- Developed **Data Science learning modules** and trained interns in **R & Excel**.

Kellton Tech Solutions Ltd, Hyderabad, India

Intern | Jan 2017 – Jun 2017

- Conducted a **comparative study on IBM Watson Analytics vs. Open Source Tools**, creating **data visualizations** using **IBM Watson Analytics & R**.
-

Projects

- **AB InBev Data Science Talent Hunt Hackathon:** Predicted demand volumes for agency-SKU combinations, securing **Rank 105/2547** with a score of **0.77529 (1st place: 0.89)**.
-

Technical Skills

- **Programming:** Python, R, SQL, PySpark, Docker
 - **Machine Learning:** Regression, Classification, Clustering, Time Series Forecasting, Predictive Analytics, **Marketing Mix Modeling (MMM)**
 - **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly, R Shiny, Streamlit, LangChain, LangGraph, LangSmith
 - **Big Data & Cloud:** Azure (Data Factory, Databricks, SQL, Azure AI Foundry, **Azure AI Search**)
 - **Data Engineering & Databases:** Data Wrangling, Feature Engineering, MySQL
 - **Visualization & BI:** Power BI, Tableau, Excel
 - **Mathematics & Statistics:** Linear Algebra, Probability, Bayesian Inference, Hypothesis Testing
 - **NLP & MLOps:** Natural Language Processing, CI/CD, Git, **Azure DevOps**
 - **Emerging Tech:** Generative AI, Large Language Models (LLM), Prompt Engineering, RAG, Vector Databases (FAISS, Pinecone, Chroma)
-

Education

NIIT University, Rajasthan, India

B.Tech - Computer Science & Engineering (CGPA: 7.61) | Aug 2013 – Jun 2017
